

JA TRANSPORTATION & STEM CAMP

ABOUT

Students in grades 9th through 12th grade will learn about the various aspects of career opportunities in the transportation and STEM fields. Students will gain skills from Junior Achievement lessons on job shadowing, how to buy a car, followed by tours of CVTC program facilities. They will then travel to Markquart Motors to tour the dealership and career opportunities. On the final day, students will have an opportunity to be hands-on at CVTC, followed by a parent luncheon to debrief what they learned during the week.
